

SkyTech Agent Program — Infrastructure

Version V1.4 · 2026-10-05 · matches repository release R3.3 · maintained by SkyTech_Manager

SkyTech Agent Program — infrastructure, data flow and roles

V1.4 · 2026-10-05 · repo release R3.3

Data flow

1. Lead pull — SkyTech_BackOffice collects businesses from Overture Maps Places (desktop-app browser); other free sources fill gaps.
2. Verification — BackOffice searches name, phone, address and likely domains; records a verdict and evidence for each lead.
3. Files — lead CSV, verification results and import SQL are saved in the local folder (Git repository).
4. Import — owner runs the SQL in SSMS; usp_ImportStagedLeads inserts new companies and updates existing ones (no duplicates).
5. Admin site — owner signs in, reviews dashboards, drills down, edits records, fixes any duplicates the live check finds; every change is audited.
6. Backup & history — GitHub Desktop pushes the local folder and release tags to the private GitHub repository.
7. Reporting — agents report to SkyTech_Manager; the Manager summarizes to the owner and asks approval before actions.
8. Demo sites — WebsiteDeveloper builds demos into the local folder (demo-sites/) with free-licence photos (Pexels); after owner approval they are published to free hosting (Netlify, planned) for the marketing agents.
9. Outreach — owner calls and emails prospects (approved scripts); outcomes are logged as Activities in the Admin site.

Agents and roles

Agent	Status	Role	Inputs	Outputs	Owner control
SkyTech_Manager	Active	Runs the program: assigns work, collects agent reports, summarizes to the owner, keeps files/versions/GitHub in order	Owner requests, agent reports	Daily summary, task assignments, project files	Claude in this project; asks before actions
SkyTech_BackOffice	Active	Pulls free leads, verifies "no website" by alternative search routes, prepares duplicate-safe SQL imports	Overture & other free sources, web search	Verified lead CSV, import SQL, verification report	agents/SkyTech_BackOffice saved skill (owner-editable)
SkyTech_WebsiteDeveloper	Active	Builds free one-page demo sites for	NoSite leads	demo-sites/<business>/index.html,	agents/SkyTech_WebsiteDe (owner-editable)

Agent	Status	Role	Inputs	Outputs	Owner control
		verified no-website leads (preview banner, no made-up facts)		manifest, sql/05 (DemoBuilt)	
SkyTech_PhoneMarketing	Planned	Prepares call sheets and scripts; owner makes every call (TCPA); logs outcomes	Demo links, lead details	Call sheets, follow-up emails (owner-approved)	Role file to be created
SkyTech_SocialMediaMarketing	Planned	Drafts posts and messages; owner approves before posting	Demos, wins	Facebook/LinkedIn/Nextdoor drafts	Role file to be created
SkyTech_ProjectManagement	Planned	Tracks the 90-day plan, checklist and milestones; flags anything late	Plan, Manager reports	Weekly status, risk flags	Role file to be created

Components and versions

Component	Where	Version	Purpose
90-Day Plan (living doc)	claude.ai artifact + docs/90-day-plan.md	V2.2	Plan, guardrails, free lead sources, pricing, timeline
Project instructions	claude.ai Project + config/project-instructions.md	V1.4	Standing rules for every session
Version register / INDEX	config/version-register.md, INDEX.md	V2.0 / V1.6	What each file and release contains

Component	Where	Version	Purpose
SkyTechCRM database	SQL Server 2014 Developer (owner's laptop)	setup V2.2, admin objects V1.4, demo load V2.1	Companies, WebPresence, Leads, Activities, DemoSites; duplicate-safe imports; audit
Admin site	admin-site/ (Node.js) at http://127.0.0.1:3030	V1.4	Login, dashboards, drill-down, CRUD, live duplicate check, Demo sites (edit, live preview, save), audit log
Lead scripts	scripts/leads/	extract V1.0, build V1.2	Overture extraction, sample + import SQL generation
Lead sample	data/samples/	CSV V1.1, SQL V1.2	100 leads, 36 verified potential clients
GitHub repository	github.com/skytechsolutions2020/skytech-agent-program (private)	R3.3	Full history of every artifact, tagged releases
Company website	skytechsolutions.us (Hostinger, Node.js)	live	Needs robots.txt, sitemap, pricing page

Lead lifecycle (Leads.Status)

New → Checked → NoSite → DemoBuilt → Contacted → Interested → Proposal → Won plus Lost
 DoNotContact

Standing rules

- Owner approves every action (automatic approval off); owner personally makes all phone calls (TCPA).
- \$0/month: free tools and free tiers only.
- Free lead sources licensed for business use; no library downloads; no bot scraping of Google Maps, Yelp or Facebook.
- No duplicate data: all imports through dbo.StgLeads + dbo.usp_ImportStagedLeads; unique indexes; live duplicate check of all tables in the Admin site.

- Every file carries a version footer; files are edited in place; changes logged in the version register, INDEX and CHANGELOG; releases tagged in GitHub.
- Downloaded documents carry no AI-related metadata.

Change log

Version	Date	Change
V1.0	2026-10-02	First version: infrastructure and data-flow diagram, agents and roles, components and versions, rules, lead lifecycle.
V1.1	2026-10-02	Admin site V1.2 and admin objects V1.2: live duplicate check across Companies, Leads, Web presence and Activities.
V1.2	2026-10-02	SkyTech_WebsiteDeveloper active: demo-site generator, first 3 demos, sql/05 marks leads DemoBuilt.
V1.3	2026-10-05	Demo sites stored in dbo.DemoSites and edited in the Admin site; unique designs per business (template V2.0).
V1.4	2026-10-05	Free-licence photos (Pexels) in demo sites; DemoSites photo columns; Admin site V1.4.
