

SkyTech Agent Program – 90-Day Plan

Oct 1, 2026 · @Skytech

Goal and summary

By early January 2027, SkyTech Solutions LLC aims to sign **15–25 paying website clients** and **\$800–\$1,500 in monthly recurring revenue, plus \$3,000–\$5,000 in setup fees**. Tools cost \$0 a month.

The engine is simple. Find local businesses with no website, build each one a free demo one-page site, and show it to the owner by email, phone and social media. Then charge to make it live, plus a monthly or yearly care plan.

- **Agents** are Claude routines run from this project, each with a written role, plus small free Python scripts. You stay the approver for every send and every call.
- **You** make the phone calls, close deals and take payment. The agents prepare everything else.
- **Volume target:** 20 businesses researched a day, 10 demo sites a week, 150–200 owners contacted a month.
- **Open question:** which free lead source and first niche to start with (see Free lead data sources).

Gaps fixed and legal guardrails

The original plan was sound. These nine fixes keep it legal, protect your domain, and close the money loop. This is general information, not legal advice.

Gap	Risk if ignored	Fix
Library data (step removed)	Library databases (e.g., Data Axle Reference Solutions) usually ban bulk export and commercial use	Removed from the plan. Leads now come from free sources licensed for business use (next section)
AI voice phone calls	FCC (2024) treats AI voices as "artificial" under TCPA; fines per call to cell phones without consent	Agent prepares lists and scripts; you or a hired caller dials. Check the National Do Not Call list

Gap	Risk if ignored	Fix
Cold email rules	CAN-SPAM fines; Gmail account suspended	Real business address, unsubscribe line, honest subject, max 30–50 a day, honor opt-outs within 10 days
Domain reputation	skytechsolutions.us lands on spam lists	Send outreach from a second address or a cheap secondary domain later; warm up slowly
Using their logo and name publicly	Trademark complaints, looks deceptive	Demo sites stay unlisted, carry a "Demo by SkyTech – not affiliated" banner, use stock images until they agree
"No web presence" is often wrong	Embarrassing pitch	Check Google, Maps, Facebook, Yelp before building; record result in SQL
No CRM	Leads lost, double calls	Status column in SQL plus HubSpot Free CRM
No contract or payments	Unpaid work	One-page service agreement; Stripe/Square/PayPal invoice before go-live
SQL Server 2014	Out of support since July 2024; Developer edition not licensed for business use	Install SQL Server 2022 Express (free, licensed for production)

Free lead data sources

The library download step is removed. Leads now come from free sources that allow business use. Overture Maps is the main source because each record already shows whether a website is listed.

#	Source	What you get	Cost and license	How to pull	Use it for
1	Overture Maps Places (main)	Name, category, address, phone, website, social links, confidence score	Free; CDLA Permissive 2.0 / Apache 2.0, commercial use allowed	Overture Maps Explorer: zoom to your city, click "Download Visible"; or Python/DuckDB by map area	Main lead list; records with no website = first candidates
2	Foursquare Open Source Places	Name, category, address, phone, website where known	Free; Apache 2.0	Download from Hugging Face (free account)	Fill gaps Overture misses
3	OpenStreetMap (Overpass Turbo)	Name, address, phone, website tags	Free; ODbL: credit OpenStreetMap, keep in a separate table	Query shops in your county with no website tag	Extra small businesses
4	Maryland Business Express entity search	Legal name, status, resident agent, formation date	Free lookups	Search each company by name	Confirm the company is active; find owner or agent name
5	Maryland Dept. of Labor license lookups (home improvement, plumbing, electrical, HVAC)	Licensee name, company, license number, city	Free public lookups	Search by trade and city	Home-services niche: owner names, active licenses
6	Google Places API (check only)	Website and phone (Enterprise fields)	1,000 free Enterprise calls a month; a billing account must be linked	BackOffice checks each lead before a demo is built	Confirm "no website" before building
7	Chamber of commerce and county business directories, Yelp, Facebook, Nextdoor	Name, phone, sometimes owner	Free to browse	Manual look-up only	Fill missing phone or owner names

Rules: never scrape Google Maps, Yelp or Facebook with bots; their terms forbid it.
Record the source of every row in Companies.SourceFile.

New BackOffice flow: download one city and niche from Overture → import the CSV into Companies → mark rows with no website → confirm with Google Places or a manual search → add owner names from Maryland lookups → hand NoSite leads to WebsiteDeveloper.

Agent team

Seven roles, one chain of work: BackOffice finds leads, WebsiteDeveloper builds demos, the two marketing agents reach owners, and the Manager reports to you each evening.

Work flows down from the Manager; every agent reports back daily

SkyTech agent team · 7 roles, daily report loop

Agent	Input	Output	Daily report line
SkyTech_Manager	Your goals, all agent reports	Today's batch, task list, evening report	Totals and blockers
SkyTech_ProjectManagement	This plan, Manager report	Timeline updates, risk flags, weekly review	Milestones on track or late
SkyTech_BackOffice	Free lead files (Overture, Foursquare, OpenStreetMap), SQL tables, batch criteria	Imports, web presence checks, NoSite leads	Checked, no-site found
SkyTech_WebsiteDeveloper	NoSite leads	Demo site, Netlify link, Drive copy	Demos built
SkyTech_PhoneMarketing	Demo links, lead details	Call sheet, script, follow-up emails, logged outcomes	Calls, interested, deals
SkyTech_SocialMediaMarketing	Demos, wins	Posts, DMs, replies to inquiries	Posts, DMs, leads

Adding agents: each agent is one saved skill with a role file. To add one (e.g., SkyTech_EmailMarketing or SkyTech_ClientSupport once clients grow past 20), write its role and add a line to the Manager's roster.

Free tool stack

Every tool below is \$0 a month; payment processors charge only a fee per sale.

Need	Tool	Free limit to watch
Database	SQL Server 2022 Express + SQL Server Management Studio	10 GB per database
Agents	Claude in this project (one saved skill per agent) + Python scripts	Your existing Claude plan
Web presence check	Claude web search; manual Google/Maps spot-check	~20 businesses a day
Demo sites	Static HTML one-pagers on Netlify or Cloudflare Pages	Unlisted preview links
Live client sites	Your existing Hostinger plan	Number of sites your plan allows
File handoff	Google Drive folders	15 GB
Email	Gmail, or Brevo free	Gmail ~30–50 cold a day; Brevo 300 a day
Calls	Your phone or Google Voice	Personal use only
CRM	HubSpot Free CRM, or the SQL Leads table	Free tier contact cap
Social	Facebook Page, LinkedIn, Instagram, Nextdoor, Google Business Profile, Canva free	Platform posting rules
Payments	Stripe, Square or PayPal invoices	~2.9% + 30¢ per payment
Contracts	Google Docs template + a free e-sign tool	Free tiers cap signatures a month
Daily reports	Google Sheet the Manager agent fills	—

SQL database design

Four tables hold everything; the Leads.Status column is the CRM pipeline. Run this script once in SSMS, then import each free lead CSV into Companies with the SQL Server Import Wizard.

```

CREATE DATABASE SkyTechCRM;
GO
USE SkyTechCRM;
GO
CREATE TABLE Companies (
    CompanyID      INT IDENTITY PRIMARY KEY,
    CompanyName    NVARCHAR(200) NOT NULL,
    Industry       NVARCHAR(100),    -- domain, e.g. Plumbing, Salon
    Address        NVARCHAR(250),
    City           NVARCHAR(100),
    State          CHAR(2),
    Zip            VARCHAR(10),
    Phone          VARCHAR(25),
    Email          NVARCHAR(150),
    ContactName    NVARCHAR(150),    -- POC
    ContactTitle   NVARCHAR(100),
    EmployeeCount  INT,
    SourceFile     NVARCHAR(150),
    ImportedOn     DATETIME DEFAULT GETDATE()
);
CREATE TABLE WebPresence (
    CompanyID      INT REFERENCES Companies(CompanyID),
    CheckedOn      DATETIME DEFAULT GETDATE(),
    HasWebsite     BIT,
    WebsiteURL     NVARCHAR(250),
    HasGoogleProfile BIT,
    HasFacebook    BIT,
    Notes          NVARCHAR(500)
);
CREATE TABLE Leads (
    LeadID         INT IDENTITY PRIMARY KEY,
    CompanyID      INT REFERENCES Companies(CompanyID),
    BatchName      NVARCHAR(100),    -- e.g. 2026-W41 Plumbing Baltimore
    Status         VARCHAR(30) DEFAULT 'New',
    -- New, Checked, NoSite, DemoBuilt, Contacted, Interested, Proposal, Won,
    -- Lost, DoNotContact
    DemoURL        NVARCHAR(250),
    AssignedAgent  VARCHAR(50),
    NextFollowUp   DATE,
    DealValue      DECIMAL(10,2),
    MonthlyPlan    DECIMAL(10,2),
    UpdatedOn      DATETIME DEFAULT GETDATE()
);

```

```
CREATE TABLE Activities (
  ActivityID      INT IDENTITY PRIMARY KEY,
  LeadID          INT REFERENCES Leads(LeadID),
  Agent           VARCHAR(50),      -- SkyTech_PhoneMarketing etc.
  ActivityType    VARCHAR(30),      -- Call, Email, SocialDM, Post, Note
  Outcome         NVARCHAR(500),
  ActivityDate    DATETIME DEFAULT GETDATE()
);
```

The BackOffice agent's daily batch query (20 unchecked companies in one industry and city):

```
SELECT TOP 20 c.*
FROM Companies c
LEFT JOIN WebPresence w ON w.CompanyID = c.CompanyID
WHERE c.Industry = 'Plumbing' AND c.City = 'Baltimore'
      AND w.CompanyID IS NULL
ORDER BY c.EmployeeCount DESC;
```

Daily workflow and volumes

About 2 hours of your time a day runs the whole machine; the agents do the rest.

1. **8:30 – Manager kickoff (5 min).** You open this project and say "Run SkyTech daily." The Manager reads yesterday's report and sets today's batch.
2. **BackOffice (15 min).** Pulls 20 companies by industry and city, checks web presence, writes results to WebPresence, moves no-site companies to Leads as NoSite.
3. **WebsiteDeveloper (20 min).** Builds 2 demo one-pagers from a template, uploads to Netlify, saves the HTML and link to Google Drive /Demos/, sets status DemoBuilt.
4. **PhoneMarketing (you, 60 min).** Agent gives a call sheet: 10 owners, script, demo link. You call; agent logs outcomes in Activities and sends the follow-up email you approve.
5. **SocialMediaMarketing (20 min).** Drafts 1 post a day (before/after demo, tips) and 3–5 polite DMs to businesses with a Facebook page but no site. You approve and post.
6. **ProjectManagement (5 min).** Updates the timeline tracker and flags anything behind.
7. **5:00 – Manager report.** One daily report in Google Sheets: researched, demos built, calls, emails, replies, deals, revenue.

Activity	Per day	Per week
Businesses checked	20	100
Demo sites built	2	10
Owner calls	10	50
Emails sent	15–30	75–150
Social posts	1	5

Offer and pricing packages

The demo is free; money comes from going live and staying live. Suggested starting prices for local small businesses are below; adjust after the first 10 conversations.

Package	Price	Includes
Free Demo	\$0	One-page preview with their services, unlisted link, 14 days
Go-Live Setup	\$199 one-time	Their logo, photos, text edits, contact form, domain connected, Google Maps embed
Care Plan	\$39/month or \$399/year	Hosting on Hostinger, SSL, backups, 2 small edits a month, uptime check
Growth Plan	\$99/month	Care Plan + Google Business Profile management, 1 post a week, review replies, monthly report
Domain	At cost (~\$15–20/year)	Registered in the client's name

Sell yearly plans with a discount: cash up front and fewer cancellations. Revenue math: 20 clients on Care Plan = \$780 a month recurring, plus \$3,980 in setup fees.

Extra revenue ideas

Each idea reuses the same leads and agents, so it adds revenue without new tools.

Idea	Suggested price	Why it sells
Google Business Profile setup and verification	\$99–\$149 one-time	Many businesses with no website also have no Maps listing; fastest win
Online booking or quote form	\$49 add-on	Salons, cleaners, contractors want leads while they work
Website chat assistant (FAQ bot)	\$29/month add-on	Answers questions after hours
Review request system	\$29/month	QR card + text link asking happy customers for Google reviews
Logo and business card design (Canva)	\$79–\$149	Many demo prospects lack a usable logo
Professional email on their domain	\$49 setup	Replaces gmail.com addresses
Website redesign for outdated sites	\$399–\$799	BackOffice also finds old, non-mobile sites, not only missing ones
Referral reward	1 free month per referral	Turns clients into salespeople
White-label for local agencies and accountants	Revenue share	They refer clients needing sites

90-day timeline

The program starts Monday, October 5, 2026 and ends with a day-90 review on January 3, 2027. The first paying client by early November is the gate that proves the offer works.

First paying client by week 5, 15–25 clients by day 90

SkyTech 90-day program, Oct 2026 to Jan 2027, ticks every 2 weeks

90-day timeline · 4 phases, 4 milestones

Phase	Focus	Exit gate
1 Setup	Tools, SQL database, demo template, agent skills, first free lead pull	10 demo sites built from real leads
2 Pilot	One niche, one city; you call daily; refine script and pricing	First paid client; reply rate known
3 Scale	Add 2 more niches; social agent active; Growth Plan upsell	10 paying clients
4 Optimize	Drop weak niches, push yearly plans, ask for referrals	15–25 clients, plan for next 90 days

The ProjectManagement agent checks progress against these gates every Friday and flags a slipped gate to the Manager and you.

Getting started checklist for this week

Tick these off; each takes under an hour.

- ☐ Download the first free lead file from Overture Maps Explorer for your first niche and city
- ☐ Install SQL Server 2022 Express and SQL Server Management Studio

- ☐ Run the SQL script above to create SkyTechCRM
- ☐ Create Google Drive folders: /SkyTech/Demos, /SkyTech/Reports, /SkyTech/Templates, /SkyTech/Contracts
- ☐ Create free accounts: Netlify, HubSpot CRM, Brevo, Stripe or Square, Canva
- ☒ ~~Create a SkyTech Facebook Page for your own company~~
- ☐ Create a Google Business Profile for your own company
- ☐ Add a "Websites for Local Businesses" page with pricing to skytechsolutions.us
- ☒ ~~Pick the first niche and area: real estate and utility trades in Baltimore City, Baltimore County and Howard County (chosen Oct 2)~~
- ☐ Ask Claude to set up the 7 agent skills and the demo website template
- ☐ Send me the lead CSV for import

Agent check, Oct 1, 2026 : nothing could be confirmed done, so every box is still unticked.

Item	Finding	How to confirm
First free lead file	Not pulled yet (library step removed Oct 2)	Say "go" for step-by-step download help
SQL Server 2022 Express, SkyTechCRM	Not visible from the web; your laptop isn't linked	Reply "installed" or link your computer
Google Drive folders, free accounts	Private accounts, not visible from the web	Reply when done
Facebook Page	Done: you confirmed your page on Oct 1 (Facebook blocks automated reading, so I go by your confirmation)	Ticked
Google Business Profile	None found for SkyTech Solutions LLC; a Yelp listing in Windsor Mill, MD showed up, possibly yours	Send me your profile link
Websites page on skytechsolutions.us	Search shows only the homepage, "Smart Tech & AI for Modern Business"; the site timed out when I tried to open it	Send me the page link once published

Item	Finding	How to confirm
First niche and city	Done: real estate + utility trades; Baltimore City, Baltimore County, Howard County; 100-lead test sample first	Ticked
7 agent skills, demo template	Not started	Say "go" and I'll build them
Lead CSV	Not received	Attach it here

Version: V2.1 (2026-10-02) — SkyTech Agent Program 90-Day Plan — V2.1. Changes: V2.0 library data step removed, free lead data sources added; V2.1 first niche and area chosen.
